**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments, see pages 2 and 3, filed 7/20/2010, with respect to the 103(a) rejections have been fully considered and are persuasive. The 103(a) rejection of the claims has been withdrawn. Specifically, since the Translation of the priority document is on record and this perfects the date, which is before the Yagita '908 reference, the rejection of the claims has been withdrawn.

***Allowable Subject Matter***

2. Claims 13, 16-19 and 22-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention relates to a printing control technique that is capable of using a plurality of printers in several methods. The claim language is directed towards redirecting a job to a different printer if a current printing device is in error. Moreover, the claims contain a user interface that includes a priority order of redirect printers to transmit a job to a lower priority redirect printer when a redirect printer with a higher priority is in error. Since the reference of Yagita was eliminated through the filing of a translation regarding the foreign priority documents, the current rejection is withdrawn. In searching for this feature of an interface displaying a priority order of redirect printers, the Examiner could not find in a reference a list within an interface that displays a list or priority order for redirect printing that displays an order for automatic switching when an

error occurs other than in the references that were eliminated. Therefore, the Examiner believes that the claims should be allowed.

Regarding the 101 rejection of claim 25, the Examiner withdraws this rejection because the Applicant specifically discloses a recording medium within the specification on page 49 as a physical medium that stores a computer program for reading by a computer for execution. The physical mediums listed include all "non-transitory" medium, which are not signals or carrier waves.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Yacoub (USP 6552813) discloses directing print jobs in a network printing system.
6. Roosen (USP 7177040) discloses Remote printer control.
